RE: - Intra hospital Transport of Unstable Critical care Hospitalized patient (I TOUCH study) endorsed by ISCCM Research committee.

The Indian Society of Critical Care Medicine (ISCCM) is a registered society under charity commissioner act. The aim of the society is to promote education, Research and awareness regarding critical care medicine across India. ISCCM is a nonprofit academic charity research organization.

Under the aegis of ISCCM, steering committee working for I TOUCH STUDY plans to collect data regarding Intra hospital transport of unstable critically ill patients.

Intra hospital transport of critically ill patients is often required for diagnostic and therapeutic indications. Intra hospital journey of these patients presents with some challenges and risks, and it often adds to the increased workload and stress of the critical care staff. Despite presence of several guidelines and few recommendations, there has been no consensus regarding the ideal practice guidelines for intra hospital transport of critically ill patients

I TOUCH study will be the first of its kind in India and will provide information regarding adverse events facing during & after Intra hospital transport of unstable ICU patients.

We can only achieve this goal of desire information only with your valuable support.

Since this study will be investigator initiated, funded by ISCCM (academic, nonprofit organization) and not sponsored by industry, we would like to request that you kindly consider waiving the ERB fees for I touch study.

Informed consent form attached.

CRTI registration is applied.

Thank you for your kind consideration

Please feel free to communicate with PI of I touch study at kapilzirpe@gmail.com if you require further information.

We look forward to your support to conduct this important study in India.

Sincerely,

Dr Rajesh Chandra Mishra

President

Dr Rajesh Pande

General Secretary
